

I am in favor of RM-10810 as proposed by James Roux, W4YA. Interest in amateur radio has declined in recent years, part, I believe due to other technological advances, such as cell phones, e-mail, etc. To stimulate and rekindle the interest in ham radio, changes need to be made.

I am a non-Morse ham. While I have taken the element 1 test, I have no intention of using a key for communication. I enjoy DX and contesting using voice. As a Tech+ I would appreciate being allowed to use a wider range of frequencies and expand my range. Therefore, Mr. Roux' petition seems the best fit for my ham lifestyle. Thank you for your interest in amateur radio and the citizens who participate in it.
